

Bioanalytical Lab Grading Protocol

Header: **5pts**

-Was the header format followed correctly?

Introduction: **15pts**

-Is the purpose of the lab clearly stated?

-Is there sufficient background on how it works?

-Is the importance to society/industry/Bioanalytical field explained?

-Is there a summary of which method(s) are used?

-Is there a brief summary of what the results were?

Methods: **15pts**

-Are the appropriate protocols summarized (no points will be awarded for retyping the handout)?

-If there were any deviations/discrepancies to the protocol, were they mentioned and explained?

Results: **30pts**

-Are all the pieces of data included in this section without conclusion drawn?

-Do ALL tables, figures, and graphs have legends explaining what is being represented?

-Are all graphs axes labeled?

Discussion, Conclusions and Questions: **30pts**

-Is there a coherent summary and interpretation of the results from the lab?

-Are all questions addressed and answered from the lab handout?

References: **5pts**

-Are all literature sources cited correctly?

Total: 100pts

Erin has gone over the grading protocol with me, and I hereby acknowledge that I understand what is expected for lab reports.
